Master's graduate in Computer Science from BINUS University with over 1 year of experience as a Data Scientist in IT consulting. Specializes in building predictive models, real-time monitoring systems, and automation solutions to streamline processes and enable data-driven decision-making. Proven track record in delivering actionable insights, improving operational efficiency, and optimizing marketing and business performance. Holds Google Cloud Certified Professional Machine Learning Engineer certification and advanced training in machine learning, AI, Python automation, and web development. Committed to leveraging data to drive measurable business impact, enhance operational efficiency, and support strategic growth through innovative data-driven solutions.

WORK EXPERIENCE

ILMUONE DATA – Jakarta, Indonesia

June 2023 – Present

Data Scientist

- Design, develop, and deploy AI/ML models on GCP, including regression, classification, clustering, NLP, computer vision, and LLM customization.
- Prepare, clean, and automate datasets, dashboards, and reports using BigQuery, Looker Studio, Google Cloud Functions, and Mailchimp.
- Develop predictive models, forecasting tools, and lead-scoring systems to optimize business & marketing performance.
- Translate data analysis into actionable insights for both technical and non-technical stakeholders.
- Built sentiment and performance dashboards for a leading telco, improving query efficiency by 20%.
- Created GenAI marketing audience activation for a digital bank, boosting campaign performance by 30% and revenue/conversions by 80%.
- Developed forecasting ROI and sentiment analysis models with up to 90% accuracy for banking and automotive clients.
- Automated marketplace & internal data workflows, reducing computation costs by 80% & operational workload by 30%.

BANGKIT LED BY GOOGLE, GOTO, & TRAVELOKA – Jakarta, Indonesia

February 2021 – July 2021

Machine Learning Engineer (Intern/Training)

- Completed a comprehensive program on AI and Machine Learning, covering key concepts, data analysis, Python automation, and deep learning techniques.
- Achieved Google IT Automation with Python Professional and DeepLearning.AI TensorFlow Developer Certificate.
- Completed TensorFlow specializations including Data and Deployment, Advanced Techniques, and Structuring ML Projects to build and deploy scalable ML solutions.
- Developed Danbam Tech, an Android app for hospital queuing using hand gesture image classification with TensorFlow, achieving 85% accuracy and improving safety and operational efficiency during COVID-19.

EDUCATION

BINUS UNIVERSITY – Jakarta, Indonesia

2021 – 2023

Master degree - Computer Science (GPA: 3.87/4.00)

BINUS UNIVERSITY – Jakarta, Indonesia

2018 – 2021

Bachelor's degree - Computer Science (GPA: 3.42/4.00)

CERTIFICATION & COURSES

- Google Cloud Certified Professional Machine Learning Engineer – Google (2025)
- Web Design – DUMET School (2023)
- Google Analytics Certification – Skillshop (2023)
- The Complete SQL Bootcamp: Go from Zero to Hero – Udemy (2023)
- Responsive Web Design – freeCodeCamp (2023)
- TensorFlow: Data and Deployment Specialization – Coursera (2021)
- DeepLearning.AI TensorFlow Developer Specialization – Coursera (2021)
- Google IT Automation with Python Specialization – Coursera (2021)
- Google IT Support Specialization – Coursera (2021)
- Mathematics for Machine Learning Specialization – Coursera (2021)
- Software Processes and Agile Practices – Coursera (2020)

SKILLS & LANGUAGES

- **Skills:** Python, SQL, Big Query, Predictive Modeling & Machine Learning, Big Data, Cloud, Looker & Tableau
- **Languages:** Indonesia (Native), English (TOEFL Score: 523)
